PROJECTS

► DevMountain Tracker | currently used by a business

JavaScript + AngularJS + HTML + CSS + Node.js +
PostgreSQL + Socket.io

Allows instructors and other high-level employees at DevMountain to track various stats, including the average health of their help queue and the students who were helped the most in a given timeframe.

Video Walkthrough: https://youtu.be/_MqEI0kMqml

Github: <https://github.com/box-space/box-space>

► Fiouse Management Solutions | done in Angular with only one week of prior instruction

JavaScript + Angular + Node.js + PostgreSQL

With Fiouse, companies can sort their employees into teams, add new users, and grant permissions to employees based on their teams.
